Weekly Bullets for Willamette BiOp Sampling – April 5, 2005

- An estimated 681 winter steelhead passed the Bennett traps this week, for a total of 931 this season (see graph below). Thirty-seven summer steelhead also passed this week. Three marked and one unmarked steelhead were observed at Leaburg Dam this week. Six marked and two unmarked steelhead have passed Leaburg this season. Whitefish continue to move past Leaburg in large numbers.

- Winter steelhead passage at Willamette Falls is far behind the numbers seen last season, and the average of the past three seasons (see graph below). Summer steelhead passage is also lagging, although it is still early in the season.
